DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

- The primary reasons for allowance for claims 1-6 are the inclusion of a franking machine comprising a guide part arranged so as to project from a printhead and relative to its jet opening plane and having correlated therewith a transport device for transporting postal objects between it and oppositely positioned conveying rollers rotating about axes oriented transverse to a conveying direction, wherein the transport device comprises two drive rollers forming together with the guide part a conveying path which are supported before and behind the printhead, and counter pressure rollers arranged opposite which exert a pressure against the drive roller, and at least two printheads, rectangularly shaped, positioned at an acute angle to the conveying direction and positioned staggered relative to one another. It is these limitations, either alone or combined, as claimed that have not been taught, found, or suggested by prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Fajour (6,390,577) teaches a franking machine including a printhead having a row of nozzles operated selectively to print a post mark on a mail item.
- Gregoire (6,048,048) teaches a postal printhead provided with a device for adjusting alignment.
- Blanluet et al. (6,895,395) teach a postal printing device with facilitated reading.
